REMARKS

Bureau of Naval Weapons requested 2 and offered to advance us [] for use in their procurement. We have transmitted Navy's offer to [] he has sent a Standard Form 1080 to Navy for the funds, has given us the account number (a no-year symbol, so it matters not when we obligate) that will be used for deposit of the amount, and whether or not the money has physically been received in the Agency, we are prepared to certify funds available today or as soon as desired.

DIA has stated FY 67 funds will be made available. We could (1) transmit this information to [] with the request that he send a Form 1080 to DIA, and proceed with contract negotiation whenever they send the money. This could involve considerable delay, or (2) we could obligate DIA's portion on July 1 under the 7155-5000 account and request [] to handle on a reimbursement basis. The undesirable side of this is consumption of our July obligating authority in this item and not having it available for NPIC business.

Air Force has made no money available. [] assured me this morning they will within a week, and that it will be 66 money. No action is appropriate until they do. Seems pretty late to do all that is necessary to use 66 money. We can try.

[] refers to a fourth agency. Presume this is the Naval Reconnaissance and Technical Support Center. They have offered funds to supplement a sum they already have on deposit with us. [] has acted, and we can certify these funds available today or as soon as desired. This is also a no-year account, it matters not whether we obligate it before or after July 1.
